

Bruger

```
graph TD; Entry(( )) --> D1{ }; D1 --> A1[Vis ven]; D1 --> A2[Opret vennerelation]; A1 --> D2{ }; A2 --> D2; D2 -- "[Slet vennerelation]" --> A3[ ]; D2 -- "[Gå tilbage]" --> A4[ ]; A3 --> D2; A4 --> D2;
```

The diagram illustrates the workflow for a user (Bruger). It begins with an entry point leading to a decision diamond. From this diamond, the flow branches into two activities: "Vis ven" (View friend) and "Opret vennerelation" (Create friend relation). Both activities lead to a second decision diamond. From this second diamond, the flow branches into two paths: "[Slet vennerelation]" (Delete friend relation) and "[Gå tilbage]" (Go back). The "[Slet vennerelation]" path leads to a third decision diamond, which then loops back to the second decision diamond. The "[Gå tilbage]" path leads to a fourth decision diamond, which then loops back to the first decision diamond.

System

```
graph TD; Start(( )) --> Venneliste[Venneliste]; Venneliste --> VisResultat[Vis resultater for ven]; VisResultat --> SendInput[/Send brugernavn eller medlemsID på ven/]; SendInput -.-> ModtagBekr[Modtag bekræftelse på slettet vennerelation]; ModtagBekr --> VisBekr[Vis bekræftelse på slettet vennerelation]; VisBekr --> End((( )));
```

The diagram illustrates a workflow for managing friend relationships. It begins with a start node leading to a stateful activity 'Venneliste'. From 'Venneliste', the flow proceeds to 'Vis resultater for ven'. This activity then leads to an input/output activity 'Send brugernavn eller medlemsID på ven'. A dashed line indicates an external interaction where data is received. This leads to a final input/output activity 'Modtag bekræftelse på slettet vennerelation', which then flows to 'Vis bekræftelse på slettet vennerelation'. The process concludes at an end node.

Database

```
graph TD; A[Modtag brugernavn eller medlemsID på ven] --> B[Slet vennerelation]; B --> C[Send bekræftelse på slettet vennerelation];
```

The flowchart illustrates the process of deleting a friend relation from a database. It begins with a start symbol (a rectangle with a pointed left side) labeled "Modtag brugernavn eller medlemsID på ven". An arrow points down to a process symbol (a rounded rectangle) labeled "Slet vennerelation". Another arrow points down to an end symbol (a rectangle with a pointed right side) labeled "Send bekræftelse på slettet vennerelation". Dashed lines extend from the left side of the start and end symbols to the left edge of the diagram area.
